ANNOUNCING A NEW RECRUITING SYSTEM

Channel Islands is beginning to implement a new system for staff and faculty recruiting. Common Human Resource System (CHRS) Recruiting, built in PageUp software, is a systemwide initiative to move all campuses to a single recruiting system.

CHRS provides a paperless way to perform the majority of the recruiting process.

The recruiting project team will be coordinating with all divisions and employees to ensure the system meets our needs. The change plan includes campus end user training and an anticipated go-live of July 21, 2021.

For more about the project on the CHRS Recruiting webpage. Stay tuned for updates on about training, testing, and go-live to the campus. If you have any questions, please contact human.resources@csuci.edu. We look forward to the future of recruiting at Channel Islands, and we appreciate your support of this project.
